VISUALIZING AND PREDICTING HEART DISEASES WITH AN INTERACTIVE DASHBOARD

Loading the Dataset

Loading The Dataset: Before we can build a view and analyse the data, we must first connect the data to IBM Cognos. Cognos supports connecting to a wide variety of data, stored in a variety of places. The data might be stored on your computer in a spread sheet or a text file, or in a big data, relational, or cube (multidimensional) database on a server in your enterprise. In our case, we will be using a spread sheet or text file for making our analysis. Load data from Heart_Disease_Prediction.csv file which consist of 14 Column

Reference: The data can be downloaded from the following:
